Bibliography management: `biblatex` package

ShareLaTeX

Using `biblatex` you can display bibliography divided into sections, depending of citation type. Let's cite! Einstein's journal paper [**einstein**] and the Dirac's book are physics related items. Next, *The LaTeX Companion* book , the Donald Knuth's website [**knuthwebsite**], *The Comprehensive Tex Archive Network* (CTAN) [**ctan**] are LaTeX related items; but the others Donald Knuth's items [**knuth-fa**; **knuth-acp**] are dedicated to programming.
